SUMMARY

A passionate visionary young developer who offers fresh ideas and an innovative perspective on technology with an unusual perspective and enjoys bringing innovative solutions to the table.

PROJECT EXPERIENCE

Virtual Paint
A painting window using hand gestures to paint.
(Python: numpy, openCV2, mediaPipe and HandTractingModule)

- Developed a real-time hand-tracking drawing application using OpenCV and MediaPipe, enabling users to draw on a canvas by utilizing hand gestures.
- Implemented hand detection and tracking algorithms to identify hand landmarks and track finger positions, enabling the application to recognize different drawing modes based on finger gestures.

VS code theme portfolio
A portfolio website inspired from vs Code
(React JS, Next js, node js, nodemailer,notionAPI)

- Developed a portfolio website using React, Next.js, and Node.js, showcasing projects, skills, and experiences.
- Integrated Notion API to dynamically fetch and display portfolio content, allowing for easy updates and maintenance.
- Implemented Nodemailer to enable contact form functionality, allowing visitors to send messages directly from the portfolio website.
